WHAT LEARNING EDGES ARE WE NOTICING; STEPPING INTO THE WORLD BEYOND?

let go what no longer serves

the grounding that holds all of our love and fear, the faith that we just have to do what's right

community work within and beyond our borders

there is beauty: nothing to produce, just permit

moving from knowing what our hearts are calling us to do, to doing that which we are called to do.

orienting toward a more positive future of action, instead of away from a present/future of fears/barriers to action

this is a time of renewal

the discomfort that arises from reaching farther beyond ourselves

the future is already here - yet not evenly distributed

moving from fear-based thinking to gift-awareness

time is now: to take small steps beyond

learning to BE more

We are not alone, we are growing as one collective body, accelerating the weaving of the field of potential together

Reminder how powerful & connecting stories of shared humanity are

Magic is afoot! We are magic!

Grateful & humbled hearing people sharing from the heart

We can find connection in unlikely places

We are all shifting together

Slowing down, time to reflect

WHAT IS ONE UNEXPECTED GIFT FROM THIS TIME THAT CAN BE A RESOURCE FOR THE WORLD BEYOND?
